

RIYA MEHTA

📧 riyagmehta in riya-mehta ✉ mriya842@gmail.com ☎ (312)-358-8464 📍 Chicago, IL

EDUCATION

University of Illinois Chicago

Master of Science in Computer Science

GPA: 4/4

August 2024 - May 2026

Dharmsinh Desai University

Bachelor of Technology in Information Technology

CGPA: 8.7/10.0

Aug 2020 - May 2024

SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL

Frameworks & Libraries: React, Next.js, Node.js, Express.js, Spring Boot, FastAPI, Tailwind CSS, Redux

Databases: PostgreSQL, MySQL, MongoDB, SQLite, Redis

Tools & Technologies: Docker, Linux, AWS, Postman, Jest, CI/CD Pipelines, Prompt Engineering, RAG

EXPERIENCE

Pramata

AI Solution Engineering Intern

July 2026 - Present

Remote, USA

- Engineer multi-stage LLM agent pipelines for contract intelligence over 5,000+ document corpora, implementing retrieval-scoped context injection and structured output parsing.
- Design extraction schemas for automated clause classification; evaluate outputs against precision/recall benchmarks and diagnose failures via run-level trace analysis.

Fuzzy Cloud

Software Developer Intern

December 2023 - July 2024

Ahmedabad, India

- Contributed to live healthcare client project building secure cross-platform management system using React, Chakra UI, Next.js frontend integrated with Rust backend (Actix) and SQLite, working with CQRS and event sourcing.
- Led MeiliSearch implementation with fuzzy search and debouncing optimization, improving search response times by 35%, enhancing SEO performance, and supporting mobile offline access via IndexedDB.

Oasis Infobyte

Web Development Intern

July 2023 - August 2023

Remote, India

- Designed and implemented a modular order management platform using Node.js, Express, MongoDB, and JWT authentication, developing secure REST APIs, role-based access control, and containerized deployment on AWS EC2.

PROJECTS

AI-Powered Adaptive Course Generation Platform

March 2026

Technologies: React, FastAPI, PostgreSQL, Redis, OpenAI API, Pinecone

- Engineered a full-stack LLM-driven e-learning platform with multi-stage pipeline for dynamic onboarding, structured outline synthesis, and streamed content generation with adaptive difficulty calibration.
- Built RAG-based doubt resolution using vector embeddings, Redis caching, and Server-Sent Events for real-time streaming, with auto-generated quizzes and a learning analytics dashboard.

Intelligent Food Donation and Waste Processing System

Sept 2025

Technologies: Spring Boot, PostgreSQL, React, Chakra UI

- Architected full stack platform connecting food donors with distribution centers using event-driven workflows with message queues for asynchronous donation processing and real-time notifications.
- Integrated LLM API to provide intelligent donation recommendations, matching donors with optimal distribution centers based on location, capacity, and food type preferences

Hand Me Down

May 2023

Technologies: Next.js, MongoDB, Tailwind CSS

- Built a campus marketplace scaling to 500+ active listings, using SSR for SEO, MongoDB aggregation pipelines for dynamic filtering, and static generation to cut page load time significantly.
