

RIYA MEHTA

 riyagmehta  in riya-mehta  mriya842@gmail.com  (312)-358-8464  Chicago, IL

EDUCATION

University of Illinois Chicago

Master of Science in Computer Science

GPA: 4/4

August 2024 – May 2026

Dharmsinh Desai University

Bachelor of Technology in Information Technology

CGPA: 8.7/10.0

Aug 2020 – May 2024

SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL

AI & LLM: LLMs, AI Agents, RAG, Prompt Engineering, MCP, Embeddings, Structured Outputs, Model Evaluation

Backend: FastAPI, Node.js, Express, Spring Boot, Actix, REST APIs, API Design, Microservices

Frontend: React, Next.js, Redux, Zustand, Jotai, React Router, Tailwind CSS, Chakra UI

Data: PostgreSQL, MySQL, MongoDB, SQLite, Redis, Pinecone, MeiliSearch, IndexedDB

Engineering: AWS, Docker, Git, GitHub Actions, CI/CD, Playwright, Postman

EXPERIENCE

Pramata

AI Solution Engineering Intern

- Translate enterprise contract requirements into AI workflows using agent instructions, retrieval, tool execution, validation, and structured outputs for contract data.

- Develop MCP plugins and programmatic tools that connect agents with application services and enterprise data, defining tool inputs, outputs, execution rules, and validation needed for reliable agent workflows.

July 2026 – Present

Remote, USA

Fuzzy Cloud

Software Developer Intern

- Developed a live healthcare application across React/Next.js, Rust/Actix, and SQLite, tracing behavior across frontend, API, and persistence layers.

- Reworked search around MeiliSearch fuzzy matching and debounced queries, cutting response time by 35% for incomplete or inaccurate input.

- Strengthened offline behavior with IndexedDB, Zustand, and Jotai, using Playwright and Postman to reproduce and verify failures.

Dec 2023 – July 2024

Ahmedabad, India

Oasis Infobyte

Software Engineering Intern

- Built order-management workflows across React, Node.js/Express APIs, authentication, validation, and persistent application data.

- Hardened order and user operations with server-side validation and failure handling, preventing invalid requests from reaching persistent state.

July 2023 – Aug 2023

Remote, India

PROJECTS

AI-Powered Adaptive Course Generation Platform

FastAPI, React, TypeScript, PostgreSQL, Redis, ARQ, OpenAI, Pinecone

- Built asynchronous course generation with ARQ and Redis, handling failures with retries, idempotent jobs, and recovery of unfinished modules.

- Built RAG-based Q&A with OpenAI embeddings, Pinecone, and Redis caching; evaluated recall@1/3/5, MRR, groundedness, and refusal rate across 25 test cases.

2025

Intelligent Food Donation & Waste Processing System

Java, Spring Boot, PostgreSQL, React, JGraphT

- Built donation matching around delivery distance and expiry urgency, reducing matching cost by 17–46% versus a greedy baseline, with geospatial queries for nearby collection and delivery.

- Added real-time status updates with Spring events and SSE, scheduled expiry checks, and an LLM API for donation descriptions, food-handling guidance, and donor messages with application-side validation.

Sept 2025
